by Joseph A. Piccoli We get a lot of calls at WNTC from people who want to listen and.

ask for their favorite songs. The only problem, they say, is that they can't find us on their radio. We'd like to clear everything up right now.

WNTC is a real station with real people but we don't operate on the regular airwaves, which is why you can't find us with a regular radio.

But you don't need a special radio, just a connection. WNTC goes through the cable television lines. To pick us up, just attach a line from your cable TV outlet to the FM antenna terminals on your radio. It's really simple to do, and it's very inexpensive. After you're hooked up,

tune it to 90 FM (soon to be in stereo) and start listening to Potsdam's

best and newest rock sound. We take requests at 265-7651 or 265-7650. hook up your cable and listen for your music! WNTC PLAYLIST
